

Let The Quinlan Companies help your facility transition your analog films to digital format. We can digitize analog radiology & mammography films with FDA approved digitizers into high-quality digital images. The images can be transferred directly into your PACS system or CD for viewing.

Why Digitizing Your Analog Film Makes Sense:

- ✓ Digital x-ray technology improves patient care by producing a higher quality image
- ✓ Significantly improves workflow
- ✓ Open architecture works with virtually any PACS system
- ✓ Enables organizations to free up valuable storage space into revenue producing office space
- ✓ No lay-out of capital expenditures for equipment

QuinlanVault®– Our Web-Based Image Management System

We can digitize your images directly into QuinlanVault our web-based image management program. Our solution is unique in that it is web-based and easily accessible from any internet connection 365/24/7. QuinlanVault also provides back-up redundancy for your images.

- ✓ Scan & host directly to the cloud
- ✓ No additional costs for server space
- ✓ Multiple users can access simultaneously
- ✓ Secure connection and HIPAA guidelines followed

Ideal for:

Breast Imaging | Orthopedics | Chiropractic | Hospitals | Dental | Legal | Insurance
